We had a very large hardware crash of WING's main servers, involve lots of disk crashes in our RAID and subsequent data loss and chaos. Fortunately, Jun Ping and Aobo of our team's admin staff were able to piece together most of our systems. The hardware crash led to about one month's work lost for many group members; but fortunately, after most conference submission deadlines. If you have data stored on our servers, they were probably lost. Do contact us at support at_sign wing dot comp dot nus dot edu dot sg if you need your accounts reinstated.
