Mentions & Resource Types

YES: (M₁) Is it just me or were some questions on Quiz 2 a surprise? There were a few questions that were not discussed in the lesson plan.

YES: (M₂) The last item, that is "Probability Models for Customer-Base Analysis.pdf", in the Resources &gt; Additional Readings by Week section for Week 3 is not accessible.

YES: (M₃) Hello, I just would like to note that on 12:30 in the answer to question 3 in the lecture 2.4 it says that the network is deadlock-free, whereas I can give a counter example: if t₁ and t₂ are executed, there is only one token in p₃, thus t₃ cannot be activated and the network is in a deadlock.

NO: (M₄) I’m working on the programming assignment for ML, week 2. I successfully submitted answers to the obligatory questions.

NO: (M₅) At around 5:00 in the lecture, we see that the regularization term in the cost function is summed from 1 to L-1. Shouldn’t this be 2 to L?

NO: (M₆) Hello. I wanted to use "e" as a number for ex 2/week 3. It didn’t work, and I didn’t find useful help with "help exponent".

Video
Videos in the different MOOC platforms are always lectures presenting the information you’ll need to pass assessments and complete assignments. In most courses, all videos will be available after the course start date. You can watch the videos at your own pace, and you can re-watch a video you’ve already seen.

Slide
Some platforms provide slides for downloading which are the contents of lecture videos.

Transcript
Some videos have subtitles in the primary language of the course. Some course videos also have translated subtitles. Video transcripts is a useful resource for information retrieval.

Quiz
Any assessment intended to promote learners to study hard and truly understand the knowledge of the course, including exercise, homework, assignment, problem, assessment.

Exam
Any examination intended to evaluate the knowledge and/or skills of learners, including quiz, test, mid-exam, final-exam.

Readings
Reading materials provided by courses.

Additional Resources
Some specialized courses have additional materials for learning, for example Java, C++ programming courses are designed to learn programming language, which will provide some programming script files.
