Mooch (derogatory term)

to get something for nothing from somebody by asking directly for it, without making any personal effort for it.
A phrase matches a document if the document contains at least one sub-sequence of tokens that matches the sequence of tokens that make up the phrase.

- query: "AND","OR","NOT"
- lexical analysis, syntax analysis and language processing;
- index

SQLite
elasticsearch

- NoSQL-style distributed document store

- GitHub
- XING
- Klout
- Stack Overflow

Solr

- Netflix
- eBay
- Instagram
- Amazon (CloudSearch)
The problem is not the full-text search engine, it’s the strategy of rank should be designed by our requirements.
